#### **DETAILED ACTION**

## Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claim 1, 3 are rejected under 35 U.S.C. 102(e) as being anticipated by Oshima (US 6081785).

In regard to claim 1, Oshima teaches a recording medium having a first and second side comprising: respective program data on said first and said second sides of said medium (see column 2 line 40); and a first area on said first side and a second area on said second side of said medium (it is inherent that a two sided disc would have areas on both sides), each said area having disposed thereon distinctive laser encoded data representing information identifying said respective program data (column 3 lines 40-44), said first area and said second area being disposed between the center of the recording medium and an outer circumference (see fig 11 element 820), said respective program data being disposed outside the outer circumference (fig. 11 element 865), and said first area and said second area occupying non-overlapping positions with respect to each other, wherein said first and second areas are burst cutting areas (column 3

Art Unit: 2653

lines 40-44. Oshima teaches two layers where the first has a BCA flag and the second has the BCA information).

In regard to claim 3, Oshima teaches the medium of claim 1, wherein said first area has substantially the same inner and outer circumferences but a different angular position (fig. 4b elements 800 a and b, it is inherent that the BCA section for the two layers would be at the same distance from the center hence giving it the same circumference. It is also inherent that a flag would be mostly at a different angular position because a flag does not contain as much information).

In regard to claim 5, Oshima teaches the medium of claim 1, wherein said medium is a DVD disk (column 4 lines 20 and 21).

In regard to claim 6, see claim 1 rejection above.

In regard to claim 8, see claim 3 rejection above.

In regard to claim 10, see claim 5 rejection above.

In regard to claim 11, Oshima teaches the medium of claim 6 wherein said first and second layers are on the same side of said medium (fig. 4 elements 800a and 800b).

#### Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 4 and 9 are rejected under 35 U.S.C. 103(a) as being unpatentable over Oshima.

In regard to claims 4 and 9, Oshima teaches all the elements of claims 4 and 9 except wherein said first and second areas are positioned as concentric rings with respect to each other.

It would have been obvious to makes these areas concentric rings because the BCA is inherently a ring around the circumference of the disk.

### Allowable Subject Matter

Claims 15 and 19-23 are allowed.

Reasons for allowance stated in previous office actions.

Applicant's arguments with respect to claims 1, 3-6, 8-11, 15 and 19-23 have been considered but are most in view of the new ground(s) of rejection.

#### Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Joseph Haley whose telephone number is 571-272-0574. The examiner can normally be reached on M-F 8:30am-5pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, William Korzuch can be reached on 571-272-7589. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
